- ✓ Express.js
- ✓ MongoDB
- ✓ MySQL
- ✓ TypeScript
- ✓ Tailwind CSS
- ✓ Git & GitHub

EXPERIENCES

Full- Stack Developer

Technic Mentors – Punjab, Pakistan

Sep 2025 – Present

- Orchestrated a full-featured POS and Office Management System using React.js, Node.js, TypeScript and Express.js.
- Conceptualized the database schemas in MongoDB/MySQL for efficient storage, retrieval, and reporting of transactional and master data.
- Augmented reporting modules in POS system that increased managerial efficiency by 25%.
- Collaborated with design and QA teams to deliver user-friendly interfaces.
- Actively participated in code reviews and sprint planning to improve overall project quality.

Web Development Trainee

SeeBiz Pvt. Ltd – Lahore, Pakistan

Feb 2025 – Aug 2025

- Fabricated dynamic web components using React.js and integrated them with backend APIs via Express.js and Node.js. Designed and implemented MongoDB schemas for storing and retrieving structured data efficiently.
- Created user authentication and session management features using JWT and bcrypt and garnered a 60-70% enhancement within 6 months .
- Developed and tested RESTful APIs for smooth frontend-backend communication.
- Gained hands-on experience with Git for version control and collaborated using GitHub.
- While strengthening my technical skills during training, I also actively participated in sessions to enhance my communication, teamwork ability, attention to detail, and time management abilities.
